**ELBE POOL SURFACE®  
SWIMMING POOL MEMBRANES**

*Beauty*, that never fades

POOL SURFACE | MADE IN GERMANY

## High-quality, reinforced swimming pool membranes with printed, embossed and refined 3D surface

Colors, shapes and textures of natural stones and vibrant exposed concrete structures harmonize perfectly with a natural environment and provide the purest swimming experience. The calm and softly textured colors create the magic of either a turquoise lagoon, an urban oasis, or a dark blue mountain lake in untouched nature.

Easy installation with the head-to-head welding technique as well as lowest fume emission during installation, round off the features of pure.

## High-quality, reinforced swimming pool membranes with printed, embossed, and finished 3D surface

The feeling of having fine sandy beach under your feet and magical watercolors that can only be found in the Caribbean or in breathtaking reef landscapes - ISLAND DREAMS swimming pool membranes add an unique island feeling to any swimming pool.

Thanks to the non-slip approved 3D surface, they are perfect for pools with beach entry, stairs, and other anti-slip areas. The high-quality finish makes them especially resistant to chlorine, UV radiation and stains.

## Phthalate-free, unicolor, and reinforced swimming pool membranes with exclusive finished surface

Crystal-clear watercolors, perfect surfaces and maximum health protection transform any pool into a 5-star pool. The contribution of elite® reinforced pool membranes, extremely durable and resistant to aging, is proven day in day out, especially by their extreme resistance to UV radiation and the intensive use of sunscreens. Therefore, they are also ideal for public pools, leisure facilities, and hotel pools.

Thanks to their innovative surface formulation, they are easy to clean, prevent dirt deposits at the waterline and they are extra resistant to chlorine, UV radiation and microorganisms.

All colors are also available in a slip resistant version with a special rice grain groove. Alternatively, in addition to their anti-slip properties, non-slip tread protection membranes create interesting color contrasts on stairs, slopes, and entrance areas (see page 20).

# Phthalate-free, reinforced swimming pool membranes with specially refined, unicolor 3D surface

With elite® motion, the world's most popular pool membranes from the ELBE Pool Surface® portfolio have received a stylish update. They combine the outstanding, functional surface features of the elite® product family with an exclusive 3D embossing.

The softly textured 3D surface of this phthalate-free pool membranes ensures a relaxed swimming experience. In addition, elite® motion meets the highest non-slip requirement to EN 16165, which means that the entire pool can be lined with the pleasantly gentle elite® motion pool membranes in a non-slip manner.

More pool feeling, impossible to find!

## Reinforced swimming pool membranes with refined, light-reflecting surface

For true pool fans, there is hardly anything more beautiful than the sight of glistening water in their refreshing refuge. The specially refined, reflective surfaces of PEARL pool membranes enhance this effect and conjure up a unique atmosphere.

But PEARL also leaves nothing to be desired in terms of functionality. Thanks to the high-quality surface finish, all color variants are UV, chlorine, and stain resistant as well as easy to clean.

# SUPRA PRINT

Premium Line

Reinforced swimming  
pool membranes  
with refined surface

The selection of printed decors and the excellent surface features make SUPRA Print the perfect pool membrane for leisure pools, pool landscapes and private pools with high demands on appearance and functionality.

The reinforced pool membranes are antimicrobial and, thanks to the refined surface, resistant to stains, UV radiation and chlorine over the long term.

**EASY TO CLEAN**

### Reinforced swimming pool membranes

The unicolored CLASSIC swimming pool membranes have all the features for a high-quality and hard-wearing pool liner.

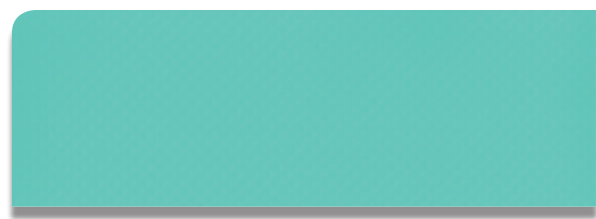

As an all-rounder, the reinforced and tear-resistant swimming pool membranes are used worldwide not only in all types of indoor and outdoor pools, regardless of size and shape, but also in exclusive private pools.

CLASSIC pool membranes are UV and chlorine resistant, and resistant to cold and weathering as well, thanks to their antimicrobial properties, do not give fungi and bacteria a chance.

# NON-SLIP

Reinforced  
anti-slip tread  
protection membranes

These membranes were specially developed and offer high safety especially in wet areas, for bare feet, for both in outdoor and indoor pools.

Whether on steps, stairs, walk-throughs or children's paddling pools, the ribbed embossing of the surface ensures a safe and pleasant feeling both underfoot and when sitting down.

Another advantage: The membranes are excellent for welding.

A photograph of a swimming pool with a grey wicker lounge chair set in a lush green garden. The pool water is clear and blue, reflecting the surrounding greenery. The lounge chair set consists of two chairs and a central table, all made of a textured grey material. The background is filled with various tropical plants, including large green leaves and banana plants. The overall scene is bright and sunny, suggesting a warm, outdoor environment.

## General information about maintenance and care for Natural Pool and Swimming Pond Membranes

- The membranes of natural pools and swimming pools of the ELBE Natural Surface® range are suitable for natural water treatment (by filtration for example)
- Regular maintenance preserves water quality (e.g., by sucking leaves and pollen)
- Before entering the pool, it is recommended to remove makeup and take a shower to get rid of any sunscreen (preservation of the biological balance of the water)
- Easy and environmentally friendly cleaning without chlorine-based products
- Cleaning with soft cloths or sponges (do not use hard brushes or pressure washers!)
- Easy winter maintenance (e.g. with the installation of a net tarpaulin to retain the leaves)

A photograph of a swimming pool with a lush green background. In the foreground, there are three lounge chairs (two large and one small) on the pool deck. The water is clear and blue. The background is filled with various green plants, including banana leaves and ferns.

# NATURAL PEARL

Reinforced swimming pond membranes with refined, light-reflecting surface

Mysterious colors and glittering water surfaces: The UV-resistant and durable Natural PEARL swimming pond membranes enchant with a special atmosphere.

Their printed surfaces provide extraordinary light reflections and give the pool a vibrant, natural character. Thanks to their high-quality formula, pools with Natural PEARL linings are harmless to the health of humans and animals and are also child's play to clean. Easy installation and minimal fume emission during welding perfectly round off the features of these reinforced swimming pond membranes.

Thickness	1.6 mm
Width	1.65 m
Roll length	25 m
Package	8 Rolls per pallet

# NATURAL SUPRA

## Reinforced swimming pond membranes with refined surface

Natural SUPRA pool liners conjure up a special flair in any bio pool. Thanks to the natural color palette, the watercolors range from classic blue to turquoise and jade to mysterious, dark green tones, depending on the light intensity.

Like all reinforced swimming pond liners in the ELBE Natural Surface® portfolio, Natural SUPRA pond membranes are extremely durable and tear-resistant as well as resistant to cold.

Thanks to their formula, they are harmless to the health of all living creatures. A protective coating on the surfaces prevents biofilm buildup and keeps them from unsightly staining and discoloration. In addition, thanks to its exceptional properties, cleaning is much easier and saves time.

# NATURAL CLASSIC

## Reinforced swimming pond membranes

Like all ELBE swimming pond membranes, Natural CLASSIC products support a pool environment that is harmless to humans, animals, and plants alike. These membranes are made from the purest raw materials and do not contain biocides.

The highly durable, 100% waterproof and UV-resistant Natural CLASSIC waterproofing membranes are suitable for lining bio pools, swimming ponds, garden ponds, artificial lakes, fish tank liners and artificial watercourses. Another plus point: these membranes have the lowest fume emission in welding.

# Accessories

## For professional installation of our swimming pool, natural pool and swimming pond membranes

Our **ELBE Pool Surface**® membranes are suitable for indoor and outdoor pool coverings, regardless of the shape or size of the pool. This applies to new constructions, to the renovation of existing pools made of different concrete, masonry, wood, steel, aluminum, polyester supports as well as for earthen pools fixed on slopes up to 60 °.

Our **ELBE Natural Surface**® membranes are ideal for waterproofing natural pools, swimming ponds and natural pools, easy and quick to install on any surface and support. Note, however, the importance of the right accessory during the installation, guaranteeing a perfect result.

### ELBE liquid PVC

(Delivery only in full package units)

Content 950 ml per can

Package 6 cans per box

We recommend the application of **ELBE liquid PVC** to ensure sealing and take care of the aesthetic appearance of the weld seam. However, this product does not replace the hot air welding quality of reinforced membranes. It also drastically reduces dirt deposits at the weld seam. It should be noted that all **ELBE liquid PVCs**, with the exception of green, dark green and slate grey, contain biocides and can therefore only be limited in their use in natural swimming pools. The viscosity can be improved with the addition of acetone.

Our liquid PVCs match the colors of our membranes and are recommended as follows:

# Training Center

**A CONCENTRATE OF EFFICIENCY**  
THE ESSENTIALS OF THE INSTALLATION FOR PROFESSIONALS  
GATHERED IN A SINGLE SESSION

## Premium quality requires premium installation

Going pro means learning from the pros! We offer ad hoc training sessions at our state-of-the-art training center in Coswig, Germany. Here, you or your customers will receive from our experts all the essential skills and knowledge for a professional installation of our reinforced membranes. On this occasion, you will also have the chance to visit the factory and learn more about the manufacture of our membranes. In order to optimize the quality of our premium teaching and guarantee sustainable competence, the number of participants is limited to 8 people per course. At the end of your training session, your participation and success will be validated by the delivery of an official ELBE certified installer certificate.
