motion

Reinforced swimming pool membranes with specially refined, unicolor 3D surface

Our **motion** swimming pool membrane combines outstanding surface properties with exclusive 3D embossing.

The softly textured 3D surface of this pool membrane ensures a relaxed swimming experience. In addition, **motion** meets the highest non-slip requirement, which means that the entire pool can be lined with the pleasantly gentle **motion** pool membranes in a non-slip manner.

More pool feeling, impossible to find!

Phthalate-free, unicolor, and reinforced swimming pool membranes with exclusive finished surface

Crystal-clear water colors, perfect surfaces and maximum health protection transform any pool into a 5-star pool. The contribution of elite® reinforced pool membranes, extremely durable and resistant to aging, is proven day in day out, especially by their extreme resistance to UV radiation and the intensive use of sunscreens. Therefore, they are also ideal for public pools, leisure facilities, and hotel pools.

Thanks to their innovative surface formulation, they are easy to clean, prevent dirt deposits at the waterline and they are extra resistant to chlorine, UV radiation and microorganisms.

All colors are currently still available in a **slip resistant version (anti-slip property: C)** with a special rice grain groove. Alternatively, in addition to their anti-slip properties, Classic tread protection membranes create interesting color contrasts on stairs, slopes, and entrance areas (see page 22).

Reinforced swimming pool membranes with refined, light-reflecting surface

For true pool fans, there is hardly anything more beautiful than the sight of glistening water in their refreshing refuge. The specially refined, reflective surfaces of PEARL pool membranes enhance this effect and conjure up a unique atmosphere.

But PEARL also leaves nothing to be desired in terms of functionality. Thanks to the high-quality surface finish, all color variants are UV, chlorine, and stain resistant as well as easy to clean.

SUPRA PRINT

Premium Line

Reinforced swimming
pool membranes
with refined surface

The selection of printed decors and the excellent surface features make SUPRA Print the perfect pool membrane for leisure pools, pool landscapes and private pools with high demands on appearance and functionality.

The reinforced pool membranes are antimicrobial and, thanks to the refined surface, resistant to stains, UV radiation and chlorine over the long term.

SUPRA

Premium Line

Reinforced swimming pool membranes with refined surface

With good reason, SUPRA swimming pool membranes are an integral part of the product range. The comprehensive color palette of unicolored decors allows a great deal of leeway in designing the pool landscape and the classic colors blend in perfectly with the desired ambience.

Of course, the unicolored swimming pool membranes are also characterized by their chlorine and UV stability. The high-quality surface finish also ensures easy cleaning and additional protection against stains and discoloration.

CLASSIC

Standard Line

Reinforced swimming pool membranes

The unicolored CLASSIC swimming pool membranes have all the features for a high-quality and hard-wearing pool liner.

As an all-rounder, the reinforced and tear-resistant swimming pool membranes are used worldwide not only in all types of indoor and outdoor pools, regardless of size and shape, but also in exclusive private pools.

CLASSIC pool membranes are UV and chlorine resistant, and resistant to cold and weathering as well, thanks to their antimicrobial properties, do not give fungi and bacteria a chance.

CLASSIC NON-SLIP

Reinforced
anti-slip tread
protection membranes

These membranes were specially developed and offer high safety especially in wet areas, for bare feet, for both in outdoor and indoor pools.

Whether on steps, stairs, walk-throughs or children's paddling pools, the ribbed embossing of the surface ensures a safe and pleasant feeling both underfoot and when sitting down.

Another advantage: The membranes are excellent for welding.

A lush green garden with a swimming pool and lounge chairs. The pool is in the foreground, and the lounge chairs are in the middle ground. The background is filled with dense green foliage, including banana plants and other tropical plants. The water in the pool is clear and blue-green.

General information about maintenance and care for Natural Pool and Swimming Pond Membranes

- The membranes of natural pools and swimming ponds of the ELBE Natural Surface® range are suitable for natural water treatment (by filtration for example)
- Regular maintenance preserves water quality (e.g., by sucking leaves and pollen)
- Before entering the pool, it is recommended to remove makeup and take a shower to get rid of any sunscreen (preservation of the biological balance of the water)
- Easy and environmentally friendly cleaning without chlorine-based products
- Cleaning with soft cloths or sponges (do not use hard brushes or pressure washers!)
- Easy winter maintenance (e.g. with the installation of a net tarpaulin to retain the leaves)

UNIQUE REFLECTION EFFECT

(Natural Pearl)

SPECIAL COATED SURFACE

Reinforced swimming pond membranes with refined, light-reflecting surface

Mysterious colors and glittering water surfaces: The UV-resistant and durable **Natural PEARL** swimming pond membranes create a captivating atmosphere. Their printed surfaces provide extraordinary light reflections and give the pool a vibrant, natural character.

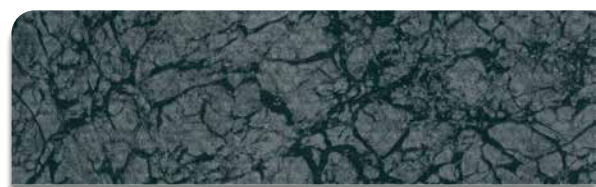

Thanks to the natural color palette of **Natural SUPRA**, the water colors range from classic blue to turquoise and jade to mysterious, dark green tones, depending on the light intensity. Due to the high-quality-formula, pools with **Natural PEARL** and **SUPRA** linings are safe for both humans and animals and are also extremely easy to clean. Easy installation and minimal fume emissions during welding perfectly round off the features of these reinforced swimming pond membranes.

Please note: Our membranes for natural pools and swimming ponds are exclusively for the waterproofing of pools in which no chemical disinfectants based on chlorine or similar products are used.

NATURAL CLASSIC NATURAL POND

Swimming pond membranes

UV STABILIZED

BIOCIDE-FREE (Natural Classic)

EASY TO CLEAN

EASY TO WELD

The ELBE swimming pond membrane **Natural CLASSIC** supports a pool environment that is harmless to humans, animals, and plants alike. These membranes are made from the purest raw materials and do not contain biocides.

The highly durable, 100% waterproof and UV-resistant Natural CLASSIC waterproofing membranes are suitable for lining bio pools, swimming ponds, garden ponds, artificial lakes, private fish ponds and artificial watercourses. Another plus point: these membranes have the lowest fume emission in welding.

UV-stabilized and resistant to weather and cold, **Natural POND** can be used flexibly in pond and water construction. This swimming pond liner is the perfect solution especially in filtered ponds or when designing regeneration areas. Natural Pond is not reinforced and available in different thicknesses and colors.

Please note: Our membranes for natural pools and swimming ponds are exclusively for the waterproofing of pools in which no chemical disinfectants based on chlorine or similar products are used.

Accessories

For professional installation of our swimming pool, natural pool and swimming pond membranes

Our **ELBE Pool Surface**® membranes are suitable for indoor and outdoor pool coverings, regardless of the shape or size of the pool. This applies to new constructions, to the renovation of existing pools made of different concrete, masonry, wood, steel, aluminum, polyester supports as well as for earthen pools fixed on slopes up to 60 °.

Our **ELBE Natural Surface**® membranes are ideal for waterproofing ponds, swimming ponds and natural pools, easy and quick to install on any surface and support. Note, however, the importance of the right accessory during the installation, guaranteeing a perfect result.

ELBE liquid PVC

(Delivery only in full package units)

Content 950 ml per can

Package 6 cans per box

We recommend the application of **ELBE liquid PVC** to ensure sealing and take care of the aesthetic appearance of the weld seam. However, this product does not replace the hot air welding quality of reinforced membranes. It also drastically reduces dirt deposits at the weld seam. It should be noted that all **ELBE liquid PVCs**, with the exception of green, dark green and slate grey, contain biocides and can therefore only be limited in their use in natural swimming pools. The viscosity can be improved with the addition of acetone.

Our liquid PVCs match the colors of our membranes and are recommended as follows:

Training Center

A CONCENTRATE OF EFFICIENCY
THE ESSENTIALS OF THE INSTALLATION FOR PROFESSIONALS
GATHERED IN A SINGLE SESSION

Premium quality requires premium installation

Going pro means learning from the pros! We offer ad hoc training sessions at our state-of-the-art training center in Coswig, Germany. Here, you or your customers will receive from our experts all the essential skills and knowledge for a professional installation of our reinforced membranes. On this occasion, you will also have the chance to visit the factory and learn more about the manufacture of our membranes. In order to optimize the quality of our premium teaching and guarantee sustainable competence, the number of participants is limited to 8 people per course. At the end of your training session, your participation and success will be validated by the delivery of an official ELBE certified installer certificate.
