Natural PEARL

reinforced membrane for swimming pools with unique reflections and special coated surface

Natural PEARL swimming pond membranes are the most efficient in their class. Whether for a biological pool, swimming pond, or natural pool, the Natural PEARL membrane is perfectly suited for natural waters, offering a unique bathing experience immersed in nature. With their exceptional reflective properties, Natural PEARL swimming pond membranes provide a natural shine. A specialized surface treatment makes them particularly easy to clean, simplifying biofilm removal. Beyond their natural appearance, Natural PEARL membranes boast high UV resistance, helping to slow premature aging. Additionally, their ease of installation further enhances the outstanding qualities of this reinforced membrane.

unique reflection effect | UV stabilized | biocide-free | easy to clean | easy to weld | reinforced

thickness **1.6 mm**

roll length **25 m**

width **1.65 m**

package **8 rolls per pallet**

Dark Green

EXCLUSIVE LINE

Natural SUPRA

reinforced membrane with special coated surface

Natural SUPRA reinforced swimming pond membranes provide a pure natural experience. Thanks to their special surface, dirt, discoloration, and time-consuming cleaning are a thing of the past. Biofilm removal is effortless. The specialized surface treatment protects against premature aging, extending the lifespan of the sealing membrane. Natural SUPRA is extremely durable and highly resistant to all stresses. In addition to its outstanding product features, it also offers a truly natural swimming experience.

UV stabilized | biocide-free | easy to weld | easy to clean | reinforced

EXTRA TEAR-RESISTANT
CLASSIC APPEARANCE
HEALTH-FRIENDLY

Natural Classic

reinforced pond membrane

Natural Classic is a reinforced membrane for coating swimming ponds or natural pools. This waterproofing membrane is particularly resistant to external influences and has an exceptional longevity. This reinforced membrane, tested according to EN 71-3 consists of ultra-pure raw materials, as well as Natural PEARL and Natural SUPRA, which are among the most health-friendly membranes on the natural swimming pool market. Natural Classic also stands out from a sanitary point of view, unlike other competing products, since it emits the lowest level of fume emission during welding, thus preserving the health of installers.

UV stabilized | biocide-free | easy to weld | easy to clean | reinforced

thickness **1.5 mm** roll length **25 m** width **2.00 m** package **12 rolls per pallet**

POND AND HYDRAULIC ENGINEERING
FLEXIBLE TO USE
QUICK AND EASY INSTALLATION

BASIC LINE

Natural Pond

hydraulic engineering and pond construction – also for filtered ponds and regeneration zones

UV-stabilized and resistant to weather and cold, Natural Pond can be used flexibly in pond and water construction. This pond liner is the perfect solution especially in filtered ponds or when designing regeneration areas. Natural Pond is not reinforced and available in different thicknesses and colors.

UV stabilized | easy to weld | easy to clean | without fabric

accessories

accessories for professional installation

Our **ELBE Natural Surface®** membranes are ideal for waterproofing natural pools, swimming ponds and natural pools, easy and quick to install on any surface and support. Note, however, the importance of the right accessory during the installation, guaranteeing a perfect result.

ELBE liquid PVC

(Delivery only in full package units.)

content **950 ml per can** package **6 cans per box**

We recommend the application of **ELBE liquid PVC** to ensure sealing and take care of the aesthetic appearance of the weld seam. However, this product does not replace the hot air welding quality of reinforced membranes. It also drastically reduces dirt deposits at the weld seam. It should be noted that all **ELBE liquid PVCs**, with the exception of Green, Dark Green and Slate Grey, contain biocides and can therefore only be limited in their use in natural swimming pools. The viscosity can be improved with the addition of acetone.

Our liquid PVCs match the colors of our membranes and are recommended as follows:

color	Slate Grey	Dark Green	Green	Light Grey	Sand	Transparent
ref. no.	2001143	2001142	2000860	2000865	2000858	2000856

General information about maintenance and servicing

- The membranes of natural pools and swimming pools of the **ELBE Natural Surface®** range are suitable for natural water treatment (by filtration for example).
- Regular maintenance preserves water quality (e.g., by sucking leaves and pollen).
- Before entering the pool, it is recommended to remove makeup and take a shower to get rid of any sunscreen (Preservation of the biological balance of the water.).
- Easy and environmentally friendly cleaning without chlorine-based products.
- Cleaning with soft cloths or sponges (do not use hard brushes or pressure washers!).
- Easy winter maintenance (e.g., with the installation of a net tarpaulin to retain the leaves)

More tips for servicing?

You will find further information in our product datasheets.

The proper use and treatment of our products is the responsibility of the installer. For further information, we recommend that you refer to the guidelines of the "**Research Society for Landscape Development and Landscape Construction e.V.**": recommendations and guidelines for the planning, construction, maintenance, and operation of outdoor swimming pools with biologically treated water (natural pools and swimming pools).
